LIDIYA ALEMAYEHU

Software Engineer | Cybersecurity Enthusiast

📍 Addis Ababa, Ethiopia ✉ lilaalex94@gmail.com 📞 +251 909 260 339 🔗 linkedin.com/in/lidiya-alemayehu-179036251 🔗 github.com/Liladet

PROFILE

Software Engineering graduate from Haramaya University with a well-rounded background spanning full-stack web development and cybersecurity. Experienced in building complete web applications (React, PHP, Python/Flask) with real-world features like payment integration and user authentication, and in testing/securing systems through hands-on penetration testing, CTF competitions, and structured security training with INSA (Information Network Security Agency). Comfortable across the development lifecycle — from writing and testing code to identifying and documenting vulnerabilities. Detail-oriented, fast learner, and adaptable to both development and security-focused roles.

EXPERIENCE

Cybersecurity Trainee — INSA Summer Camp 2026
Information Network Security Agency (INSA), Ethiopia

- Performed a full penetration test of "VulnBank," a deliberately vulnerable banking application, identifying and documenting five vulnerabilities including SQL injection, IDOR, business-logic flaws, and broken access control; produced a professional written report.
- Conducted structured security testing of an Android application (InjuredAndroid), following a repeatable methodology: reproduction steps, exploitation evidence, root cause, and remediation recommendations.
- Studied networking, Linux/Windows fundamentals, C programming, assembly, Active Directory, and web/mobile application security as part of an intensive training curriculum.

Competitor — CyberShield 2026 CTF ("Towards a Secure Digital Ethiopia") Sept 2026
SecureLabs IT Technologies · ALX Ethiopia · Addis Ababa

- Competed on a 4-person team across a 6-day national cybersecurity competition covering system hardening, red-team, and blue-team/incident-response challenges.
- Built and configured an isolated lab environment (Kali, Ubuntu Server, Windows Server/AD) to harden systems and validate configurations under time pressure.
- Investigated live incident-response scenarios using Wazuh, independently solving multiple challenge flags through systematic analysis.

PROJECTS

YagoutPay Store — E-commerce Platform with Payment Integration
React, TypeScript, TailwindCSS · Flask (Python)

- Built a full-stack e-commerce platform with shopping cart functionality and an integrated payment gateway (YagoutPay), including AES-encrypted transaction data and success/failure callback handling.

Foodie — React Food Delivery Web App
React, Tailwind CSS, Framer Motion, Firebase

- Developed a responsive food-ordering app with cart management, animated UI transitions, and Firebase Firestore for order data.

Haramaya University Student Online Registration System
PHP, MySQL

- Built a web application for student course registration and profile management, including an admin panel for managing students and courses.

AirBnB Clone & ALX Higher-Level Programming
Python

- Completed a series of Python projects (data modeling, OOP, command interpreters) through the ALX Software Engineering curriculum, including a clone of the AirBnB backend.

EDUCATION

B.Sc. Software Engineering
Haramaya University
Graduated June 2026 · CGPA 3.09
Capstone Projects I & II · Software Testing & QA · Fundamentals of Security

TECHNICAL SKILLS

Programming
Python | Java | C | JavaScript | TypeScript | PHP

Web Development
React | Flask | Node.js | Tailwind CSS | Firebase | MySQL | REST APIs

Security & Testing
Burp Suite | sqlmap | Wireshark | Nmap | Wazuh | Ghidra | Manual Testing | Vulnerability Assessment

Platforms & Tools
Linux (Kali) | Windows / AD | Git | VMware

CERTIFICATIONS & TRAINING

- INSA Cybersecurity Summer Camp — networking, web/mobile app pentesting, Active Directory, OS internals
- PortSwigger Web Security Academy — web vulnerability labs
- ALX Software Engineering Program — Python, higher-level programming

LANGUAGES

Amharic — Native | English — Fluent

SOFT SKILLS

Analytical Thinking | Attention to Detail | Clear Documentation | Team Collaboration | Fast Learner
